- HTML
- Javascript
- Trailwind
- Security & Session Storage
- Git & Github

- CSS
- Bootstrap
- MERN Stack (MongoDB, ExpressJS, ReactJS, NodeJS)
- User Authentication & Authorization
- Postman

PROJECTS

Leather Website: https://davinchleatherco.com/
Website was designed (or curated) to market and showcase custom leather goods for Davinch Leather Company. The website features a page which describes the bespoke process and how the artisan crafts each custom piece. Additional links include an about and contact page to reach the craftsman.
- **Role:** Designer & Developer
- **Technologies Used:** HTML, CSS, Tailwind, Javascript, ReactJS, GSAP

Disaster Relief Application: https://new-relief-app.vercel.app/
Web application created for a Disaster Relief team allowing volunteers to create profiles which would allow admin to see all volunteers that are active or inactive. The app would give admin the ability to view personal contact information of the volunteers in case of deployment which would enable readiness. Web application focused on authentication and authorization functionalities tailored for the administrative and volunteer user face roles.
- Role: Designer & Developer
- Technologies Used: HTML, CSS, Tailwind, Typescript, ReactJS, NextJS, Prisma, MongoDB, GSAP

Developer Portfolio: https://www.jeremydev.codes/
Portfolio website was built to highlight my work, skills, and expertise as a web developer. Leveraging a multitude of languages this portfolio demonstrates my proficiency in front-end development and animation.
- Role: Designer & Developer
- Technologies Used: HTML, CSS, Tailwind, Javascript, ReactJS, NextJS, GSAP

EXPERIENCE

Hillsborough County Fire Rescue – FIREFIGHTER & PARAMEDIC   *2019-Present*
Tampa, FL

Collaborated seamlessly with fellow firefighters, medical personnel, and law enforcement during high stress emergency situations, demonstrating the ability to quickly adapt while working with a team, delegate tasks, and perform under stress to ensure the safety and well-being of patients in critical situations.
- Responded to emergency incidents and provided critical patient care, demonstrating adaptability and quick decision-making skills.
- Utilized technology such as medical equipment and communication devices to deliver efficient services to the community.
- Implemented protocols and procedures with precision, ensuring the safety and well-being of individuals in stressful environments.

Tampa Bay Outfitters - CUSTOMER SERVICE ASSOCIATE   *2016-2021*
Tampa, FL

Provided the highest quality customer service alongside fellow sales team members. Trained four new employees in sales transactions, inventory management, product/gear knowledge, and remerchandising the floor room. Continuously gained knowledge in all product and gear specifications to provide the customer with the best possible support on their trips.
▪ Enhanced customer experience through retail recommendations and problem solving skills, contributing to increased sales and customer service.
▪ Utilized attention to detail in visual merchandising while incorporating brand standards to create appealing product displays.
▪ Collaborated with team members to streamline operations and improve store efficiency.
▪ Utilized Microsoft Excel to efficiently input and organize product information for shipments received from vendors and ensured accurate inventory management and timely updates to the store's database.

Harbour Island Athletic Club & Spa – FRONT DESK HOSPITALITY ASSOCIATE   *2014-2016*
Tampa, FL

▪ Managed front desk operation, including appointment scheduling and customer inquiries utilizing organizational and multitasking skills.
▪ Utilized software systems for scheduling and payment processing, quickly adapted and proficient in new software systems.
▪ Provided exceptional customer service, fostered positive relationships with clients and team members.

United States Air Force – SECURITY FORCES GROUND COMBAT SPECIALIST   *2008-2013*
Moody Air Force Base, GA

Mastered the qualifications for Security Forces Fire Team member a part of one of the largest base defense ground combat units in the Air Force, which entailed learning extensive knowledge on ground combat, precision marksmanship, heavy weapon systems, and base defense procedures. Deployed to Joint Base Balad, Iraq to ensure the safety of 16 thousand personnel and over 20 billion in resources. Deployed to Bagram, Afghanistan to provide overwatch security for Anti-Terrorism Unit.
▪ Developed leadership and teamwork skills while serving in ground combat operations.
▪ Utilized various technological equipment devices for communication and surveillance, ensured effective coordination and response to security threats.
▪ Excelled as Fire Team Leader for over a year which entailed training new airmen on mounted and dismounted tactics for deployment mission protocol.
▪ Worked with the Office of Special Investigators to gather intelligence and provide security in routine operations outside Bagram Airfield.
